Health Risk Assessment Initial Report

Joe:

Congratulations on choosing to take a proactive role in your health. With the knowledge in your personalized **Wellness and Prevention Health Risk Assessment** report you will gain an understanding of the impact your past lifestyle choices have had on your current health risk status. Most importantly, this revolutionary report will enable you to use this information to predict whether you are heading toward the genetic expression of chronic health or chronic sickness in the future.

There are five questions that form the foundation of our revolutionary, unique, and evidence-based health risk assessment, report, and recommendations. These are:

1. What is your current health risk status? (**Identify your Health Risks**)
2. What lifestyle stressors are **CAUSING** your current health risk status? (**Identify the CAUSES of your Health Risks**)
3. What is your predicted future health risk status? (**Predict your Future Health Risk Status if you do not Address the Causes of your Health Risks**)
4. What lifestyle choices and health resources do you **REQUIRE** for health recovery and your future Wellness and Prevention? (**Identify the Solutions for your current Health Risks and Future Wellness and Prevention**)
5. What is your ongoing health risk status? (**Regular Wellness and Prevention Health Risk Assessments**)

Joe your personalized **Wellness and Prevention Health Risk Assessment Report** answers these foundational questions for you.

HRA Summary

Quality of Life Rating™

Wellness & Prevention Index™ Score

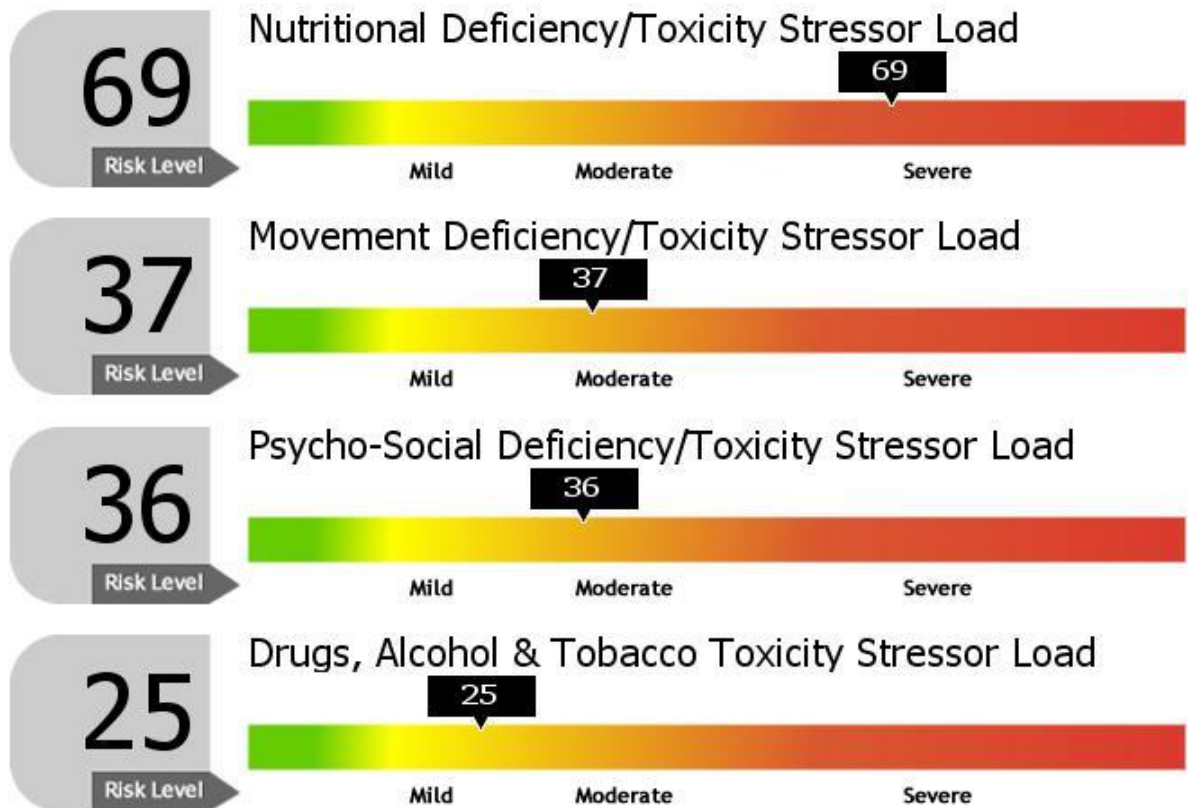

59

Wellness & Prevention Index™

Warning! Your Wellness and Prevention Index score is MODERATELY LOW. Your current lifestyle habits are putting you at **SIGNIFICANT RISK** of chronic illness, accelerated aging, and decreased quantity and quality of life. You need to take **IMMEDIATE ACTION** to change your lifestyle habits.

59

If you are not within the green area of the graph (a score of 90 or above) then, without lifestyle habit change, you are heading away from wellness and prevention and toward sickness, disease, and accelerated aging in the future. The further you are away from the green area of the graph the faster you are moving toward sickness, disease and accelerated aging.

Your revolutionary **Wellness and Prevention Index™** score is based on data from your individual Allostatic Load Risk Rating, Lifestyle Stressor Load Risk Rating and Quality of Life Rating. All this data is then weighted, combined, and analyzed to produce the most comprehensive, most early detective, and most predictive health rating in history: the **Wellness and Prevention Index™** Score.

Think of your individual **Wellness and Prevention Index™** score as the single best direct indicator telling you where you are and where you are headed. Your score represents the combination of the most significant determining factors wrapped into a single direct rating of your current and predicted future health status.

*For a more detailed explanation of these results, please refer to the **HRA Report Interpretation** document.

The Solution: How to Get and/or Stay Well into the Future

Change Your Lifestyle: Change Your Gene Expression: Change Your Health!

Joe what is the ONLY solution to get and stay well into the future? To reduce your stress load; to reduce the rocks in your backpack, and to change the way you are expressing your genes! What is the ONLY way to reduce your stress load that is caused by unhealthy, stressful lifestyle habits? To replace unhealthy lifestyle habits with healthy lifestyle habits! To provide the sufficient resources your genes need to express health and stop exposing your genes to the burden of deficiencies and toxicities that lead to the expression of illness.

Joe you have the power to change your lifestyle, change your gene expression, change your health, and change your life! You have the power to decrease your Lifestyle Stressor Load Risk Rating, decrease your Extrapolated Allostatic Load Risk Rating, improve your Quality of Life Rating and improve your **Wellness and Prevention Index™** Score and live a better, longer life!

How do you learn which choices are healthy and how to implement and SUSTAIN these healthy choices? You have several options:

1. Follow the recommendations of your practitioner Lawrence Chiropractic Clinics;
2. Utilize the guidance found in the "Improving My Score" section of your online system (there is a PDF document for each lifestyle stressor load listed on page 6); and/or
3. Talk to your practitioner Lawrence Chiropractic Clinics about the 90 Day Lifestyle Plan, the revolutionary new online program that provides everything you need to help you attain maximum improvement in your Wellness and Prevention Index.

In addition to the information and expertise provided by your practitioner Lawrence Chiropractic Clinics, the book "The Wellness & Prevention Paradigm" by Dr. James Chestnut is an excellent resource.
